DIV OF OIL GAS & MINING

Paul -

I'm to conduct an on-site of the northern part of the S/047/050 area [that our office tracks as expired notice UTU66357] today at 1:00 pm. I spoke with Craig Caldwell and Robert Covington last week and they said they have the funds to mobilize their dozer so that earthwork can begin on that area. Last week one of our equipment operators started work on the UTU66358 project area (that you track as the southern part of S/047/050). We sent Hiko Bell an certified advisory letter (dated August 11th, received by Hiko Bell on August 12th; electronic copy attached) indicating that our office would begin work on the UTU66358 area. Mr. Covington asked if we would send them a bill for collection (in lieu of the civil action cited in our August 11th letter).

I'll keep you apprised of the progress of reclamation of each area.
